## Section A. PERSONAL DATA

Name and Surname	Josep Maria Grau Junyent		
DNI	39124155M	Age	68
Researcher's identification number	Researcher ID		
	Scopus Author ID		
	ORCID	0000-0001-7560-224X	

\* Obligatorio

### A.1. Current professional situation

Institution	HOSPITAL CLINICO Y PROVINCIAL DE BARCELONA		
Dpt. / Centre			
Address			
Phone	93 227 54 00 - 2907	Email	<a href="mailto:jmgra@clinic.cat">jmgra@clinic.cat</a>
Professional category	Senior Consulting Internist Physician	Start date	2001
Keywords			

### A.2. Academic education (Degrees, institutions, dates)

Bachelor/Master/PhD	University	Year
Medicina y Cirugía	Universitat de Barcelona	1982
Esp.Medicina Interna	Universitat de Barcelona	1979
Medicina y Cirugía	Universitat de Barcelona	1975

### A.3. General quality indicators of scientific production

In the last 5 years I have participated in 30 publications.

From those, first, second or last (corresponding) in 12, 40%. h Index: 40 and 1166 citations accumulated.

## Section B. SUMMARY OF THE CURRICULUM

Summary of the scientific trajectory.

Currently, triple activity as: IDIBAPS accredited researcher / Professor and Director of the Department of Medicine of the Faculty of Medicine and Health Sciences of the UB / Specialist in the Internal Medicine Service of the Hospital Clinic de Barcelona.

The scientific trajectory began in 1980 with the preparation of the doctoral thesis that I was able to defend in 1982 with the title 'Contribution to the study of alcoholic myopathy'. This was followed by a 4-month stay at Hanhemann University in Philadelphia, which led to collaborative work with that University.

Subsequently, I have led the muscle research and mitochondrial function laboratory recognized by the Generalitat of Catalonia as a Consolidated Research Group, accredited in five different calls, the last one for the 2018-20 period. (exp. 893/2017).

The Group has also consolidated itself in Area 4 of the August Pi Sunyer Biomedical Research Institute (IDIBAPS), Clinical and Experimental Neurosciences, specifically in the Muscular Research and Mitochondrial Function Group, whose ultimate manager is the one who signs this document. All this research work is also embedded within the CIBERER, for which I am currently responsible (Mitochondrial Functionalism Laboratory, U722).

The Muscular Research and Mitochondrial Function Lab accredits more than 25 subsidized projects (competitive and private) which has allowed the publication of more than 200 articles in top-level journals, and the defense of 10 doctoral theses always in the field of diseases muscles, mitochondrial functionalism in relation to HIV infection and the deleterious effects of substances and toxins in the mitochondria. Similarly, the Muscular Research and Mitochondrial Function Group has made a notable contribution to the field of inflammatory myopathies, either

by describing new autoantibodies, different clinical forms, limiting and questioning the existence of pure or isolated forms of polymyositis and contributing to the etiopathogenesis of inclusion body myositis.

### Section C. MOST RELEVANT MERITS (ordered by typology)

#### C.1. Publications

AC: Autor de correspondencia; (nº x / nº y): posición firma solicitante / total autores
